### Notes:

**Agrifood ERP** refers to enterprise resource planning (ERP) process management software that integrates multiple business applications, including a traceability system, and is targeted to agrifood businesses.

**Agrifood Traceability** refers to traceability software with a focus on agriculture or agrifood business needs.

**Disclaimer:** This list has been compiled for reference only and does not reflect endorsement or approval by IAF or the Governments of Canada and BC. Applicants are solely responsible for ensuring the appropriateness of any traceability system for their operation or project and are encouraged to seek advice from an industry professional if required to evaluate the most suitable option for your business.
